Moves

what a mouse does out in the wood — *Winter Burrow*

Roll only when the outcome is uncertain and failing costs something. Say what you're doing, and the GM names the move and the stat. Roll d20 against it.

D20 ROLL	RESULT
Equal to or under	**Done**
Up to 5 over	**At a cost**, and the GM picks it
More than 5 over	**Fails**

A cost is one you can see: an extra hour, a Warmth step, a slot left behind, a noise, d4 damage.

Advantage when a tool, a neighbour or a good plan helps. **Disadvantage** when a condition says so, or you're encumbered.

Pass or fail when a rule names the failure: save or wet, save or stuck.

MOVE	DONE	AT A COST	FAILS
Climb STR / DEX a trunk, a bank, a beam, a drift	You're up, or down	You make it, but it takes an extra hour, or something falls from your pack	You fall: d6 damage, back where you started
Sneak DEX past something, or up on it	It never knows. If you attack, you go first and roll d12	You're past, but it heard something and is looking your way	It knows where you are, and it acts first
Cross DEX ice, a gap, a thin branch, running water	Across, dry	Across, but wet	You go in: wet, d4 damage, back where you started
Force STR a lid, a stuck door, a stone, something caught	It gives	It gives, but loudly, or mark a use on what you forced it with	It won't move. Find another way or another tool
Haul STR a loaded sled, something heavy, someone who can't walk	It moves at the usual pace	It moves, but each leg costs an extra hour	Not as you are. Lighten it, get help, or leave it
Search WIL an hour, for something you can name	You find it	You find it, but it took an extra hour	The hour's gone. The GM tells you one true thing about why
Read WIL tracks, a sky, a sound	Ask two: what was here, how long ago, where it went, what tomorrow's weather is	Ask one	Nothing you can trust
Lure WIL something out to where you want it	It comes where you want, when you want	It comes, but closer or sooner than you'd like. It acts first	It won't come, or it comes for you now
Talk round WIL someone wary, angry or afraid	They listen, and give you a straight answer	They listen, but want something first	They shut you out for today
Make do DEX / WIL a splint, a snare, a sling, a patch	It works until you're home	It works once	The materials are spent

Not every action is a move. Walking, gathering and anything without real risk just takes its hour. Fighting, running and hiding are on the primer. Ask a Read about tomorrow's weather and the GM rolls it now and keeps it.
